Add prefetch instruction

Regular load doesn't work

- Cause a page fault
- overwrites a register
- Wait
- Access violation

Prefetch instruction

Programmer or compiler inserts this

```
For (j=0; j<100; j++)
    for (i=0; i<100, i++) {
        x[i][j] = c * x[i][j]
        prefetch(x[i][j+k]);
    }
```
